

Helpful data when you want it, automatic alerts when you need it.™

Insight remote monitoring allows you to view how your entire network of solar lights are performing on the ground—from the comfort of your desk.

At any time, simply log in to the Insight platform to see the status and geolocation of each light. If further diagnostics is desired, you can drill down into recent data to determine if a system was commissioned properly and if it is working as expected. And if regularly reviewing your dashboard doesn't fit into your schedule, Insight will send automatic notifications if any system is compromised or not working the way it's supposed to.

Sol's Insight platform is a tool that can save your department time by removing the guesswork and by protecting your investment.

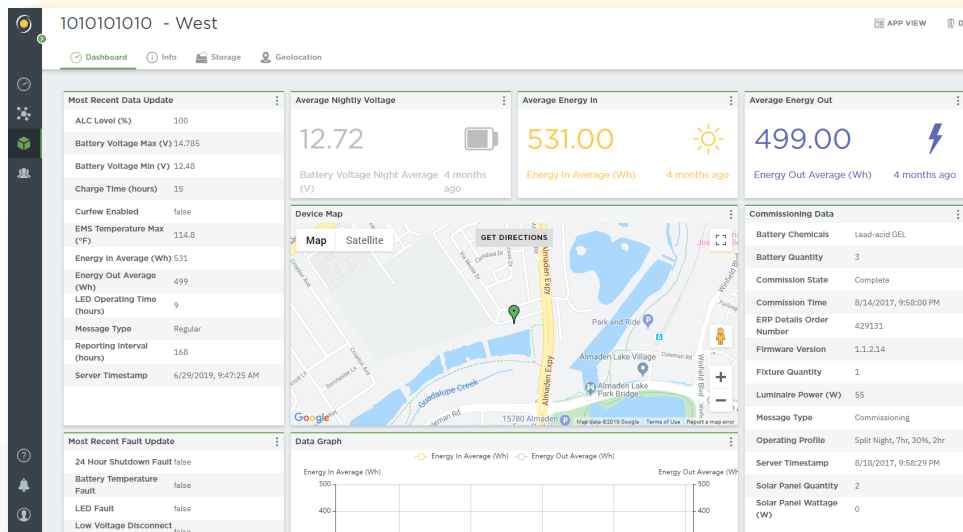

FEATURES

Receive automated notifications

Our expert product technologists can access your platform's data to help resolve issues

Check light status anytime with an easy-to-use, cloud-based dashboard that includes Google Map overlays, battery health, faults, and more

Provide peace of mind with smart monitoring that ensures the systems' health over time and protects your investment

Commissioning confirmation

API integration available

PRICING

Every EverGen lighting system includes a **complimentary 12-month subscription** to Sol's Insight remote monitoring platform. Extended subscription packages are available. Contact our sales team for more information.

To receive Insight remote monitoring, customers must sign off on terms and conditions. An email address is also required to receive Insight services. Contact a Sol sales representative for details.
